

NUX

MINI PEDAL

MICRO USB PORT

Connect to PC/MAC using a micro USB cable for upgrade of firmware.

Note: You can't connect a USB power supply to the USB port. A conventional power supply is required for operating this product.

POWER IN

9V DC with center negative, and capable of supplying 300mA or more.

SPEED KNOB
Varies the sweep speed.

VOLUME KNOB
Control the level of signal.

OUTPUT
Connect the OUTPUT of the pedal to your guitar amp or the input of the other effects unit with a 1/4-inch mono phone plug.

INTENSITY KNOB
Control the amount of sweep deviation.

LED INDICATOR
Lights up when the pedal is enabled.

ON/OFF Switch
This foot switch is used to turn effect on/off.

INPUT
Connect the INPUT of the pedal to your guitar or some other effects unit with a 1/4-inch mono phone plug.

INTRODUCTION

The Monterey Vibe is perhaps the most colorful effects we created and it can be used as chorus, rotary speaker or phaser. By using a powerful 32bit float point DSP, we recreate the complex physical phenomena of 4-stage phaser based on a pulsating bulb surrounded by four photoresists.

Features

- Virtual analog algorithm for highly accurate recreate of every stage of allpass filter and the associated pulsating driver circuitry.
- 120%(+3dB) boost level when your crank up the volume knob.
- Buffer or true bypass.

Performance

- Ultra low noise, high performance 96kHz/24bit A/D and D/A converters
- 100dB typical Dynamic Range.
- Zero latency analog routing for superb audio performance.
- 32-bit floating point processing with high performance DSP core
- Micro USB port for upgrade firmware.

More

- Luminous knobs for checking on the dark stage
- Strong and lightweight aluminum die-cast chassis
- 9V center negative DC supply, 90mA current draw
- Dimensions: 94(L) X 51(W) X 53(H) mm / 3.7(L)X2.0(W)X2.08(H) inches
- Weight: 174 g / 6 oz

Setting the Bypass Mode

Connect a 9V power supply to the DC input socket:

- The LED will blink in green briefly to indicating current mode is buffered bypass.
- The LED will blink in red briefly to indicating current mode is true bypass.

To change the bypass mode, unplug the pedal first, and press and hold the footswitch while re-applying power to the pedal. the pedal will cycle to the next mode, and the color of led indicates the current mode.

*Specification may change without notice.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
